Platform-independent file-based approach: AutoCAD For Windows 10 Crack can read and write design files from files using Microsoft Windows, Linux and Macintosh operating systems. Originally the approach was built around Microsoft Word files, but other format such as HTML, XML, TXT and CDX files are also supported. Dynamic, user-based approach: AutoCAD Activation Code 2002 and later can leverage the power of the dynamic scripting language, AutoLISP, to create application based on users, or groups of users, not companies or machines. The AutoLISP interpreter can execute on all platforms including Windows, Linux and Macintosh operating systems. Object-Oriented Design (OOD) approach: Object-Oriented Design (OOD) is a primary feature in AutoCAD and AutoCAD LT. It includes an object-oriented programming language called ObjectARX. ObjectARX can also run on all platforms including Windows, Linux and Macintosh operating systems. ObjectARX is a C++ class library, which was also the base for: products extending AutoCAD functionality to specific fields creating products such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D third-party AutoCAD-based application. Interoperability with Microsoft Office AutoCAD supports the exchange of data with other Microsoft Office products (Word, Excel, Powerpoint) and allows file conversions and linking to many Microsoft Office apps including Microsoft Word. AutoCAD can export data as: Microsoft Word's DOCX format Microsoft Excel's XLSX format The DOCX format is used for many different things like presentation files, drawings, tables, etc. The Excel format is more common for documents than presentation files, but it can be used for documents as well. The XLSX format is a hybrid format for Excel spreadsheets. It is not a true MSX format, because Excel XLS files are not an exact superset of MSX XLS files, but has a close enough relationship that users can open Excel files created with AutoCAD's XLSX export, and a Word or PowerPoint file containing Excel data or formatting with relative ease. AutoCAD's DOCX format is tightly associated with Microsoft Office. AutoCAD's DOCX format can open and create presentations in Powerpoint,

Microsoft Outlook and Mozilla Thunderbird as well as in Windows and Linux versions of Microsoft Office. In addition to providing interoperability, DOCX files can be compressed and encrypted, allowing for the secure transmission and storage a1d647c40b
