References External links Official site Japanese site Category:Windows graphic primitives Category:Graphics software Category:MacOS graphic toolsQ: How to use jQuery for a CSS animation? I'm trying to animate a 3D rectangle when it enters the page by adding a div containing a gradient (the animation) before the content of the site. I'm trying to use CSS3 animation with jQuery. I have no idea how to use animate(), but it has to do with something like this: $('#fullscreen').css({ width: 800, height: 450, '-webkit-transform':'rotateY(45deg)', '-moz-transform':'rotateY(45deg)', '-o-transform':'rotateY(45deg)', '-ms-transform':'rotateY(45deg)', 'transform':'rotateY(45deg)' }); I'm using the same technique for rotating a div which I used for a game I was trying to make. My game rotates and animates a div from the side, then when you mouse over it, the div moves to the top of the screen, I was using this technique for the side movement, but I just can't figure out how to use jQuery for it, since that's the only code I've used for my project. Can someone help? Thanks! A: Is this the effect you want to achieve? HTML:
